Experience

- Incubate Nepal Jun. 2026 – Present
Research Scholar Kathmandu, Nepal
- Researched geriatric healthcare needs across multidisciplinary care workflows to scope technology-driven solutions.
 - Built a full-stack React Native mobile app as capstone project, integrating frontend, backend, and REST APIs.
 - Completed certified training in first aid, emergency response, and public health awareness.
- TechSanjal Feb. 2026 – Jul. 2026
Frontend Developer Intern Kathmandu, Nepal
- Improved Next.js app performance by ~30% and achieved a 90+ Lighthouse SEO score via SSR/CSR optimization.
 - Built 15+ reusable components and REST API integrations, cutting feature delivery time by ~25%.
 - Reduced merge conflicts by ~40% across a 4-engineer team through structured Git workflows and code reviews.
 - Live: Gurkha Loyalty, Ecommerce
- Void Nepal Jun. 2025 – Jan. 2026
Frontend Developer Intern Kathmandu, Nepal
- Built responsive, production-ready frontends for 3+ products from scratch, from design to deployment.
 - Partnered with founders and designers to translate requirements into UI, cutting feature delivery time by ~30%.
 - Built reusable components and optimized rendering, reducing page load time by ~25%.
 - Live: Gyann, RestroTrackynn, Void Nepal
- Kalpabriksha Nepal Jan. 2025 – Mar. 2025
Frontend Developer Intern Kathmandu, Nepal
- Migrated the organization's website from legacy tech to React.js.
 - Shipped a Volunteer Management System that improved internal NGO operations by ~50%.
 - Live: Kalpabriksha, Volunteer Mgmt System

Projects

- Realtime DevOps Platform | GitHub Jan. 2026 – Feb. 2026
- Built a full-stack collaborative code editor with React, Express.js, WebSockets, and Yjs for real-time multi-user editing.
 - Designed a Jenkins CI/CD pipeline automating builds, Docker image creation, and deployment.
 - Containerized services with Docker and configured NGINX as a reverse proxy for request routing.
- Cloud-Native DevOps Engineering Showcase | GitHub Jan. 2026 – Present
- Built a CI/CD pipeline with GitHub Actions automating testing, Docker builds, and versioned Docker Hub deployments.
 - Orchestrated multi-stage Dockerized services with Docker Compose and an NGINX reverse proxy, reducing image size.
 - Designed Kubernetes manifests and IaC with Terraform and Ansible for scalable, cloud-ready deployment on AWS.

Education

- Chandigarh University 2026 – 2030
BCA Mohali, Punjab

Skills

Languages: JavaScript (TypeScript), Python, SQL (PostgreSQL, MongoDB), HTML/CSS
Frameworks: Next.js, React.js, Node.js, Express.js
DevOps & Cloud: Docker, Kubernetes, Git, GitHub Actions, AWS, Jenkins, ArgoCD, NGINX, Terraform, Ansible, Linux, Bash
Databases: MongoDB, PostgreSQL, Redis
